

We're Here.  
We're Local...  
...We're Growing!

**ior**  
**PETROLEUM**  
**FUELLING AUSTRALIA**

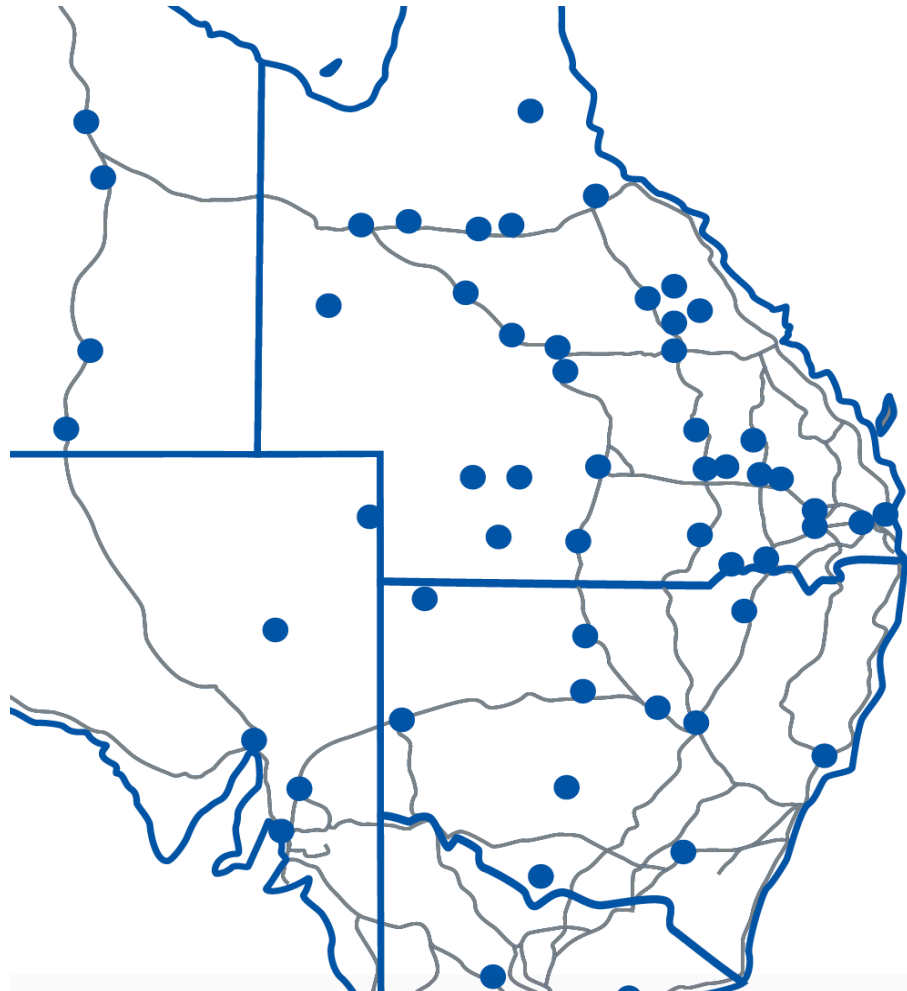

Since 1984, IOR Petroleum has been an Australian-owned family company, helping fuel regional and remote Australia with more than 60 diesel stop facilities and fuel depots. Today, we shine a spotlight on the next generation of IOR's 24/7 unmanned diesel stops across Queensland, which will enable us to provide you with even better service and fuel management efficiencies.

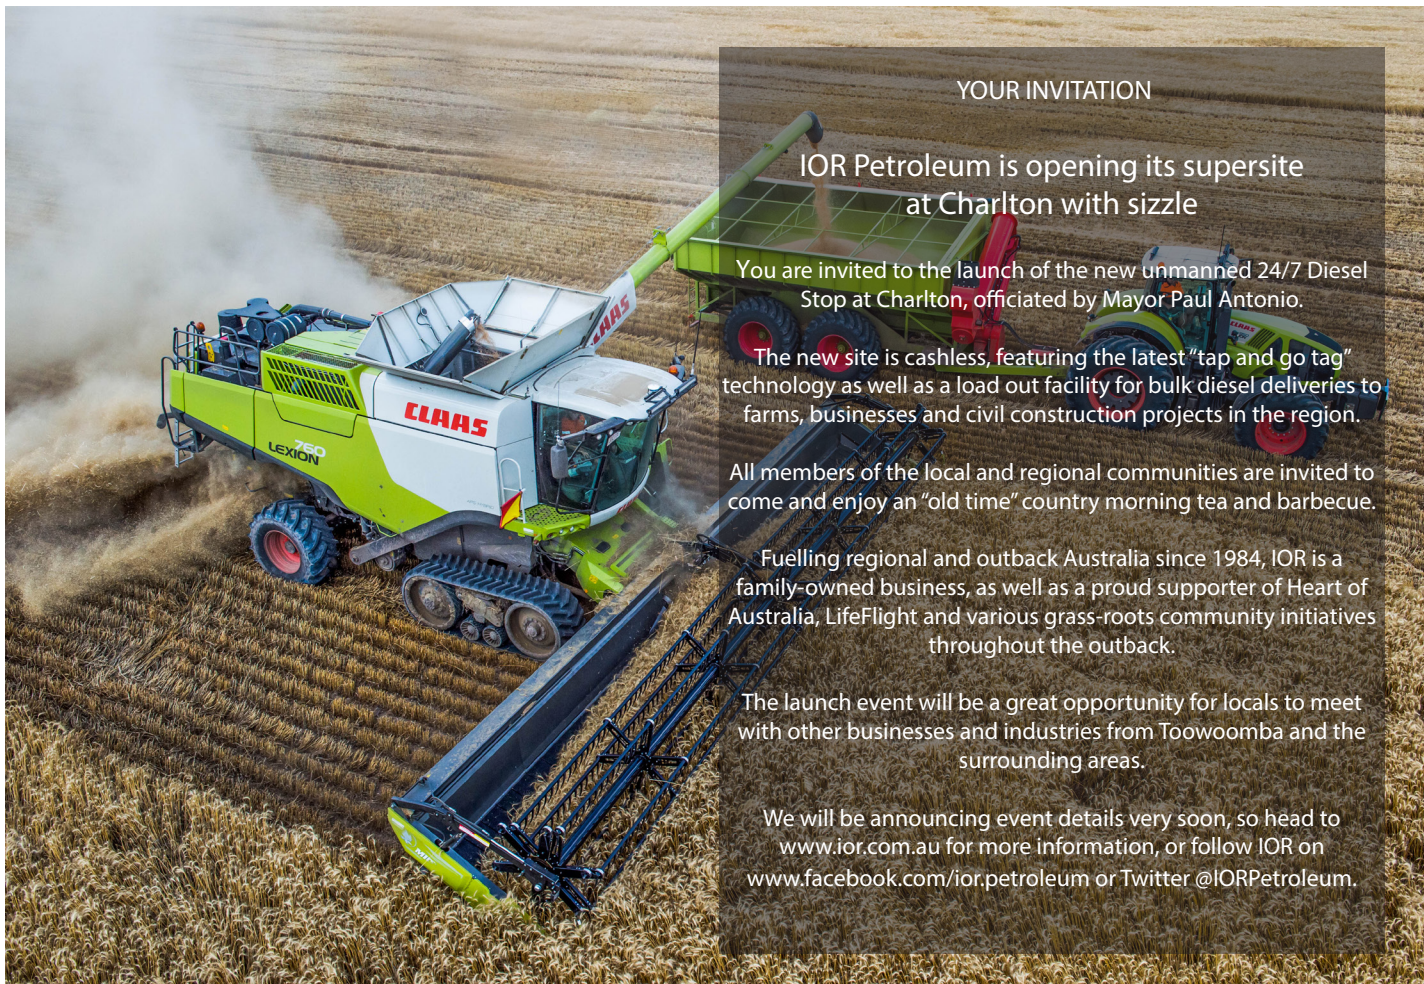

## Charlton - Toowoomba Launch

This year, IOR has opened new sites at Gundagai, Barcaldine and Mt Hope (NSW). Our latest opening, timed to coincide with Toowoomba FarmFest in early June, is our Toowoomba Enterprise Hub site on the Warrego Highway at Charlton.

The facility will be unmanned and have 16 fast-flow nozzles with a load-out facility discharging at 900L/min. This site will enable us to provide a fast and reliable delivery service for bulk fuel users in the region. We welcome everyone to the opening party during FarmFest week.

For more information on how IOR Petroleum is fuelling Australia, call 1300 457 467 or go to [www.ior.com.au](http://www.ior.com.au).

## YOUR INVITATION

### IOR Petroleum is opening its supersite at Charlton with sizzle

You are invited to the launch of the new unmanned 24/7 Diesel Stop at Charlton, officiated by Mayor Paul Antonio.

The new site is cashless, featuring the latest "tap and go tag" technology as well as a load out facility for bulk diesel deliveries to farms, businesses and civil construction projects in the region.

All members of the local and regional communities are invited to come and enjoy an "old time" country morning tea and barbecue.

Fuelling regional and outback Australia since 1984, IOR is a family-owned business, as well as a proud supporter of Heart of Australia, LifeFlight and various grass-roots community initiatives throughout the outback.

The launch event will be a great opportunity for locals to meet with other businesses and industries from Toowoomba and the surrounding areas.

We will be announcing event details very soon, so head to [www.ior.com.au](http://www.ior.com.au) for more information, or follow IOR on [www.facebook.com/ior.petroleum](https://www.facebook.com/ior.petroleum) or Twitter @IORPetroleum.

## We "go the extra mile" for you...

### New locations in the coming months for:

**Dalby, QLD:** located just off the Warrego Highway, we are providing a great addition to our network for existing fleet users and local businesses at our new Dalby site. We will be in town with our friendly and reliable bulk fuel delivery services for users in the wider region and look forward to meeting you.

**Warwick, QLD:** located centrally in town, we are excited to bring IOR's great "bush" service to the Southern Downs for main line freight carriers, farms and industries alike. Our site is drive-through, easy to access and will offer our unique bulk fuel delivery service.

**Gracemere, QLD:** The facility will be located conveniently to the south of the Capricorn Highway and will provide easy access for all. As well as the 24/7 unmanned Diesel Stop facility, the site will also be developed as a mechanical workshop to maintain our fleet of trucks and trailers servicing Central Queensland. This new hub for our fleet will enable faster and more efficient delivery to customers throughout Central Queensland.

Other sites to operate soon are located at Barcaldine and Yatala in Queensland, as well as Port Augusta in South Australia.

## Unique products and solutions

IOR has been a pioneer in the development of self-bunded, above-ground fuel storage systems, and has developed world leading technology to help you track and manage your fuel use. Our TAG system enables cashless transactions anywhere in Australia at our unmanned facilities and this is how IOR fuels road transport, farms and businesses operating across mainland Australia.

IOR's state-of-the-art fuel monitoring and tracking systems offer unique opportunities for you to gain savings on your fleet and equipment management and ensure that you will never run out of fuel, even in the most remote parts of Australia.

IOR has become the "go to" fuel solutions provider because of its safety and compliance history, local easy-to-contact staff, tank solutions capabilities, reliability, fleet ownership and technology.

## Continued support for sustainable communities

IOR is proud to provide sponsorship to help build better and more sustainable communities in regional and rural Australia. Our sponsorships include grass-roots community events like the Quilpie Cup, Daly Waters Campdraft and Rodeo, McKinlay Race Club, Cloncurry and District Race Club and many more. IOR also supports numerous other organisations such as the Heart of Australia, Toowoomba-Surat Business Enterprise (TSBE), and LifeFlight.

Other community sponsorships include:

- Chinchilla Melon Fest
- Roma Echidnas
- Outback Barrel Horse Circuit
- Julia Creek Dirt and Dust Festival
- Roma District Rugby League Referees
- St Joseph's Chinchilla Fete
- Alpha Show
- Dirranbandi Campdraft
- Bedourie Camel Races

IOR is family owned and operated and understands the importance of reliability, flexibility and friendly "bush" customer service. We talk your language and we are proud of our long-term relationships. That's why we are always prepared to "go that extra mile" for you.

## Services to more industries

Our technology leadership enables us to provide integrated fuel management and storage solutions delivering reduced operating costs to our customers. For more than 30 years, IOR has been the choice of businesses across the road freight, livestock carrying, agribusiness, oil and gas industries for fuel supply.

In recent years, IOR has also grown its aviation fuel business with a focus on supporting users in remote and regional areas. The division supports local airports, crop sprayers, tourism operators, emergency services and farm users and provides high quality Shell JetA1 and Avgas fuels.

IOR sources its products from Australia's leading fuel refiners and importers, ensuring high quality fuel and reliability.
