

Digital Farming Showcase & PrecisionAg Toowoomba

Friday, March 19, 2021 (9am-12pm)
Rural Centre of Excellence

Come and hear from 6 Agtech businesses about digitising your farm and getting into PrecisionAg

Bligh farming at Pampas was recently involved in a project to 'digitise' their farm with sensors and technology:

- 6 different Agtech businesses working together on 1 farm!
- Getting better internet coverage across the farm
- Installing sensors such as soil moisture, dam and channel depth, leaf temperature, weather, and more
- Rapid soil mapping and NDVI satellite imagery
- Dashboard to give you the info you need
- Getting the data in and out of the tractor

This workshop is suitable for farmers in the early stages of their Agtech and PrecisionAg journey, although all are welcome.

Bookings essential <https://www.tsbe.com.au/events/digital-farming-showcase>
