

Eye Care Education

by Heron Eye Care

Time: 5:30 pm -9:00 pm

Date: 23 April, 2020

Location: Burke & Wills Hotel, Toowoomba

Cost: \$0.00

Topic 1: The complicated world of Dry Eye Disease and how to treat it effectively.

Dry Eye Disease is a complicated multifactorial eye disease of the tear film and ocular surface. The recent Dry Eye Workshop 2 (DEWS2) is the definitive guide to dry eye diagnosis and treatment. Thankfully in recent years treatments have developed and improved to improve treatment success.

This presentation will summarise the DEWS2 report and present new effective dry eye treatments

Topic 2: The Red Eye survival guide.

There are many causes of a red eye and many are sight threatening. This survival guide will improve your ability to recognise the red eye danger signs which require referral and where the referral should go too. General practitioners, pharmacists, optometrists and ophthalmologists can all play an important part in saving the sight of a red eye patient.
