

New Acland Stage 3 Continuation Project

New Acland Mine is located near the town of Acland, approximately 14km north-west of Oakey and 35km north-west of Toowoomba.

New Acland Coal Pty Ltd, a subsidiary of New Hope Corporation Limited, currently operates the existing New Acland Mine, an open cut, thermal coal operation with existing capacity to produce up to 4.8 million tonnes (Mtpa) annually of product. New Acland is internationally known for having one of the lowest greenhouse gas producing coals in the world.

A major economic contributor to the Toowoomba and Surat Basin region, the mine injects \$300 million annually into south-east Queensland's economy and \$100 million annually into the Darling Downs economy. The operation currently employs about 275 locals and 507 contractors, and provides for around 2,300 indirect jobs.

New Acland Mine is awaiting Environmental Impact Statement (EIS) approval for the proposed \$850 million Stage 3 Expansion of the mine. If the expansion goes ahead, it will extend the life of the mine until 2029, and provide

260 additional jobs during construction and up to 435 jobs during the mine's operational phase.

Key Objectives for Expansion

- Continue the operation of a sustainable and profitable coal mine;
- Construct and operate a mine that complies with all relevant statutory obligations and continues to improve operations to ensure best practice environmental management;

“ The expansion will bolster the mine's current annual economic contribution to the south-east Queensland economy to **\$530 million** and contribute **\$12 billion** over the lifetime of the mine. ”

Find out more on New Acland Mine here:
Or visit www.newhopegroup.com.au

- Construct, design and operate a mine that does not compromise environmental and social indicators and standards
- Make sufficient use of current infrastructure, with upgrades and expansions for the required capacity increase;
- Expansion of mine capacity to 7.5 Mtpa
- Reduce the disturbance of the environment by minimising the requirements for road and rail constructions and using of areas already disturbed for storage and handling facilities; and
- Use similar proven strategies to those adopted at the existing mine, for example:
 - ▶ salvage and stockpiling of topsoil,
 - ▶ early and progressive rehabilitation of disturbed areas,
 - ▶ use of recycled water for mining operations,
 - ▶ protection of water quality by appropriate management systems, and
 - ▶ adoption of appropriate landform designs to ensure sustainability and planning for a nominated final land use.

Local Procurement

New Hope Group recently released a web form for local contractors to register their interest in supplying the New Acland Mine Stage 3 Expansion.

If you are a supplier of these goods and services categories relevant to the project, and wish to register your details, please visit www.aclandproject.com.au

Opportunities

Opportunities exist for businesses working in the following industries:

- Accommodation and travel services
- Aviation Services
- Building and Maintenance
- Bus, Coach and Car Hire Services
- Camp Services
- Car/Light Vehicle Supply
- Car Servicing inc. Parts Supply
- Civil Construction Services
- Cleaning Solutions
- Consulting and Professional Services
- Doctors and Health Services
- Drilling Services
- Electrical Parts Supply
- Engineering and Parts Supply
- Equipment Hire
- Facilities Management
- Fencing Supply and Installation Services
- Freight and Logistics Services
- Fuel and Lubricant Supply
- Furniture and Whitegoods Supply
- Gardening and Landscaping Services
- Gas Cylinder Supply and Services
- General Industrial Labour Services
- Geological Services
- Glaziers and Glass Replacement
- Information Systems Supply
- Inspection/Control and Testing Services
- Office Products and Stationary
- Processing Equipment Parts Supply
- Security Services

Darling Downs
