

Grow your global opportunity with export insight

Queensland's export markets continue to trend upward, reaching new 12-month highs, at a time when producers and businesses across the Darling Downs and wider region are looking to the market opportunities available to expand their business operations.

While the desire to enter the Asian market is cited by many producers in the region, activating the market is well-known to be a tough pursuit, and one that requires extensive time, cultural understanding, connections and cost, with no guarantee of success.

To lessen these barriers, TSBE/FLA established Shanghai and Beijing Offices and enlisted the expertise of Liu Wen, our Business Development Manager for Greater China.

Since establishing the role, Wen is fielding a five-fold increase in requests for assistance from members looking to access the Asian market. Ms Liu has a proven track-record of success in strengthening business entry and activation into the market, and in-country assistance under the Activate China program.

After meeting about 200 potential exporters from the Darling Downs region and beyond during the business delegation AccessChina'16,

Wen continued to work with clients from the trip to secure export pathways.

This is a signal of the strength and potential our region holds, through its innovative producers, connectivity through the Brisbane West Wellcamp Airport's weekly freight service to Hong Kong, and established partnerships with Asian markets.

Wen returned to the Darling Downs in August 2017 to meet with our current and burgeoning exporters, the Wellcamp Airport and other key stakeholders to maximise these opportunities.

TSBE and FLA members are able to use Wen's expertise in the Chinese market to grow their business and expand into the Asian market.
